

SIDAK MANN

Scottsdale, AZ | (602) 718-5502 | sidaksmann@gmail.com | sidakswebsites.com | github.com/stubbyfowl

EDUCATION

Brophy College Preparatory

High School Diploma, Class of 2029 | Cumulative GPA: 4.0/4.0

Coursework: AP U.S. History, AP Seminar, AP Microeconomics, AP Macroeconomics, AP Precalculus, Honors Chemistry

Phoenix, AZ

Expected May 2029

EXPERIENCE

Arktos Systems

Co-Founder (2-person hardware startup)

Phoenix, AZ

May 2025 - Present

- Own all firmware and software for BlackBox, a standalone flight-recorder PCB that captures voltage, current, GPIO, and UART activity from a target board for embedded debugging; built on an STM32H743VIT6 with microSD logging
- Carried V1 from schematic to fabricated, assembled hardware through the JLCPCB PCBA pipeline, preparing BOM and CPL files and sourcing [X] real LCSC part numbers to replace generic KiCad placeholders
- Built and deployed the company site from scratch in React/TypeScript/Vite, migrating hosting to Vercel with Cloudflare DNS; also ran packaging design, ad creative, and shipment logistics

Sidak's Websites

Founder

Scottsdale, AZ

Jul 2026 - Present

- Design, build, and deploy websites for local small businesses; delivered [X] client sites to date
- Built the client pipeline end to end: SMS outreach that converted at [X]% versus [X]% for cold calling, a pitch built around search invisibility, and a Stripe split-deposit checkout
- Track monthly active users and referral sources per client and use the data to steer marketing; [one concrete result: grew Client A inbound calls from X to Y in Z weeks]

PROJECTS

Ghostlink

Feb 2025

- Built an end-to-end encrypted messaging app solo, backend through deployment, with GIF support, threads, replies, edit/delete, themes, and a hidden interface; ported to iOS, macOS, Windows, Linux, and Tizen OS

RomExplorer

2026

- Android app in Kotlin and Jetpack Compose for managing a local ROM library on an Odin 3 handheld: SAF folder scanning, Room database, ScreenScraper.fr metadata, and status tagging; debugged via ADB logcat, resolving a SecurityException from incorrect persistable-URI permission handling

Fortran Compiler (2025). Wrote a working compiler from scratch, covering lexing, parsing, and code generation.

LEADERSHIP & ACTIVITIES

wheresmywater.org

Founder

Scottsdale, AZ

Jul 2026 - Present

- Building a free public tool that returns Arizona groundwater conditions by address: AMA status, assured water supply designation, nearby well data, and land subsidence risk, so rural residents can see whether their water is secure
- Pursuing fiscal sponsorship and press coverage ahead of launch; motivated by field work in Peru with communities facing far harder water access than Arizona

Polo and Equestrian

Competitor, Arizona Polo Club and Cave Creek Polo Club

Arizona

Jan 2018 - Present

- Best polo player in my age group in the state of Arizona; top youth player at both Arizona Polo Club and Cave Creek Polo Club
- 2nd place in a regional hunter-style competition; three 1st-place medals across state riding events

Speech and Debate, Policy Debate. (Aug 2025 - Present). Compete and meet twice weekly; participated in events with the Arizona House of Representatives.

CubeSat Club, Committee Member. (Aug 2025 - Present). Contributed to three satellite launches [name your role: integration, testing, comms]; studied solar cell fabrication at ASU's MTF center.

The Loving Library, Ambassador. (Jan 2024 - Present). Public ambassador for the nonprofit; fundraise for and promote events.

Cross Country, JV. (Aug 2025 - Present). Train at morning practices year-round and compete through the September to November season.

SKILLS & CERTIFICATIONS

Languages: C++, C, Python, Kotlin, TypeScript/JavaScript, HTML/CSS

Embedded & Systems: STM32 / ARM Cortex-M, KiCad, JLCPCB PCBA workflow, Linux and Linux kernel internals, ADB

Web & Tools: React, Vite, Node.js, Framer Motion, Vercel, Cloudflare, Stripe, Git

Certifications: Investing in Stocks: The Complete Course (Udemy)
